

Part 1

Questions 1 - 5

Here are some sentences about health. For each question, complete the second sentence so that it means the same as the first. Use no more than 3 words. Write only the missing words on your answer sheet. You may use this page for any rough work.

Example:

- 0 The nurse took her temperature.
She had by the nurse.

Answer: 0 her temperature taken

- 1 I don't get backache now that I've started exercising regularly.
I backache before I started exercising regularly.
- 2 Why don't you try to get more exercise?
If I were you, I get more exercise.
- 3 Listening to loud music caused his hearing problems.
His hearing problems listening to loud music.
- 4 It's a long time since my dad has been to the doctor.
My dad to the doctor for a long time.
- 5 The patient did not recover from his illness for a long time.
The patient a long time to recover from his illness.

Part 2

Question 6

You are going to visit a haunted castle at the weekend.

Write a note to an English friend of yours. In your note you should:

- say which castle you are going to visit.
- mention who is organising the visit.
- invite your friend to go with you.

Part 3

Write 35 - 45 words on your answer sheet.

Write an answer to one of the questions (7 or 8) in this part. Write your answer in about 100 words on your answer sheet. Put the question number in the box at the top of your answer sheet.

Question 7

- This is part of a letter you receive from your English friend, Martha.

I've just started a diet, and I've been going swimming every day. I think it's really important to stay fit. Do you agree?
What do you do to keep fit?

- Now write a letter to Martha, answering her questions.
- Write your letter on your answer sheet.

Question 8

- Your English teacher has asked you to write a story.
- Your story must begin with this line:
Last summer I saw the strangest sight I've ever seen.
- Write your story on your answer sheet.

Part 5

Questions 26 - 35

Read the text below and choose the correct word for each space. For each question, mark the correct letter A, B, C or D on your answer sheet.

Example:

- 0 A deny B hope C believe D explain

Answer: 0 A B C D

Most people (0) that fat is bad. If we get too fat, our (26) don't fit properly and, more seriously, fat has been linked to all kinds of medical problems.

But fat is actually amazing. Thousands of years ago it was not always (27) to find food, so (28) peoples had to be able to eat plenty when food was available and to store excess food to keep them alive (29) there was no food. There were no canned foods, no freezers, and (30) of the techniques we use to store food nowadays. Miraculously, people's bodies turned excess food (31) fat, which was stored in their cells!

But that's not all. Body fat also kept us warm when temperatures (32) Without body fat, we would never have (33) the Ice Age.

So, the (34) time you find yourself or a friend speaking negatively about fat, remember: if it wasn't for fat, we wouldn't (35) here today!

- 26 A dress B clothes C outfit D costume
- 27 A hard B correct C difficult D easy
- 28 A ancient B elderly C old-fashioned D older
- 29 A as B until C after D when
- 30 A some B all C none D any
- 31 A from B up C into D on
- 32 A dropped B fell C rose D increasing
- 33 A existed B lived C continued D survived
- 34 A last B next C every D second
- 35 A have B be C work D stay

Part 4

Questions 21 - 25

Read the text and questions below. For each question, mark the correct letter A, B, C or D on your answer sheet.

Veronica Jones, Flying Saucer Investigator

One evening about 20 years ago, I watched a documentary about how, in 1947, a 'flying saucer' had crashed in Roswell, New Mexico. Several people who had seen the crash were interviewed, including a nurse who said she had examined an alien who had been injured in the crash. At first, the people of Roswell were told that it was not a flying saucer but a weather balloon. Shortly afterwards they were told that it was not a flying saucer but a weather balloon. I decided that the only way I could learn the truth about flying saucers was to investigate them myself.

I have done a lot of research and although I still haven't discovered the truth about Roswell, I have discovered the truth about hundreds of other UFOs. A lot of UFOs are actually army planes or weather balloons, while others turn out to be natural phenomena like planets or comets. By far the largest number of UFOs turn out to be so-called 'fireball' meteors: slow-moving meteors that can take up to a minute to travel across the night sky.

When I'm investigating a UFO report, I arrange to meet the person at the place where they have seen the flying saucer. I like to interview a witness at the scene and then take photographs to help me identify any contacts at local military bases and weather stations, and then check the witness's details against my information. In about 95% of the cases I've dealt with, the 'flying saucers' turn out to be weather balloons, aeroplanes or natural phenomena. That still leaves 5% that, no matter what, just cannot be explained.

- 21 What is the writer's main purpose in writing the text?
A to explain why she became a flying saucer investigator
B to explain why she enjoys watching television documentaries
C to describe how local weather stations use balloons
D to describe how she discovered the truth about Roswell
- 22 Veronica says that UFOs
A are always seen near weather balloons.
B always travel across the sky slowly.
C usually fly near natural phenomena.
D often turn out to be a kind of meteor.

- 23 What will Veronica do if you think you have seen a flying saucer?
A meet you and ask you to describe what you saw
B take a photograph of you for her records
C ask you to take a photograph of it for her
D suggest that you contact a military base

- 24 When Veronica investigates a flying saucer, she
A makes sure that someone has taken a photo of it.
B always tells the local weather station before she arrives.
C can't find a logical explanation about 5% of the time.
D gives the witness the names of people who can help.

- 25 What would Veronica probably say about her job?

A It's exciting. I travel around the world and meet lots of fascinating scientists.

B It's not as exciting as it sounds. I spend lots of time interviewing people and checking information.

C You need to be a really good photographer to do this job well.

D I enjoy watching documentaries on TV so this job is perfect for me.
